# Decimal Bingo

**Preparation:** Let's play bingo! Fill in the bingo card with random decimal numbers up to the thousandths place. Create the bingo call out pieces by cutting along the dotted lines. Separate the circles and squares.

**How to Play:** Pick a facedown circle, then call it out. This is the decimal place. Pair it with a facedown square for the actual number. Tick off all your boxes that have both. Return the call out pieces face down, then repeat with a different person. First to form a bingo pattern wins!
